

Special points of interest:

- Pacific 2010 Exposition
- HMAS Sydney Load Trials
- Relegen goes Social with new Twitter account

Current Activities

Pacific 2010

Relegen is again participating, staffing our stand at PAC10. With design and development of the stand and the exhibition well underway, it promises to be another great opportunity to not only showcase baseLINE and the Relegen brand but to network with old colleagues and potential new clients. Come visit us at stand 6F7.

DMO Audit

The Defence Materiel Organisation recently audited Relegen's Quality Management System in order to assess our suitability to sit on the Grouped Asset Management (GAM) Panel. The GAM will replace the existing Ship Repair Panel. DMO Staff attended Relegen and interviewed key staff over a three day period. The requirements of the audit were met and were able to provide the Objective Quality Evidence they required. Relegen has been given an overall score of 84% and deemed a very low probability of risk to project.

Rolls Royce Australia

Relegen and Rolls Royce Australia Services continue to work together in support of the Amphibious Afloat Support Systems Program Office (AASSPO) with the extension of Brian Woolmer's services in support of Amphibious Afloat Support Group. Congratulations for Brian and Peter Porter who continue to provide valuable technical writing skills for continuing to provide excellent services into Rolls Royce again this year.

3M

Relegen is proud to announce the formalization of our relationship with 3M into their Smart Safety Program in Australia.

New Relegen Website

After a few false starts, the new Relegen websites are due to launch on February 1. We are certainly looking forward to a the new look websites and the functionality that they will bring to our potential and existing clients.

GMEC

Walter, Craig and members of FSU attended the WESTRAC Christmas BBQ held at Parramatta. The afternoon consisted of a tour of the facility, followed by lunch and a photo session. This year sees the team working together as part of the load trial and top end overhaul. Of note the FSU members conducting the top end overhauls and resilient mount changes all received signatures in their competency logs and recommended that this training be ongoing.

MATIS Panel

Relegen is very excited to be accepted onto the Materiel Information Systems (MATIS) panel for Defence; to provide logistics Information Systems Support Services under a Standing Offer Panel Arrangement. The Materiel Information Systems Branch (MATIS) is responsible for the through-life support of the Standard Defence Supply System (SDSS), Applications and interfaces, as well as the Materiel, engineering and miscellaneous systems outside of the supply chain domain. This includes the introduction of new functionality, system modifications, maintenance of the approved configuration and provision of customer Service. This will certainly be an area where Relegen can add valuable input with our long history of expertise in the domain.

FFG SPO

Relegen is very pleased to be able to report two contracts awarded in support of the FFG SPO, in the areas of Mandatory Planned Maintenance Identification governance and Test and Evaluation support to thee FFG Upgrade. Relegen once again affirms our commitment to supporting Australian Defence and providing excellence into our clients business domains.

Bright New Year

As evidenced in this our first publication for 2010, there is already plenty afoot that we can share with you our clients, suppliers, partners and friends; The growth of the product and the Relegen brand into more new and expansion in existing markets lends for a very exciting year for all of us. Please send any feedback to admin@relegen.com
