FOR IMMEDIATE RELEASE

Relegen Pty Ltd accepted for NSW Government ICT Services Scheme – Advanced Registered Supplier List

SYDNEY, AUSTRALIA – 03 FEBRUARY, 2014 – [Relegen](#), a leading supplier of people and technology to defence, government and asset-intensive industries, has announced today that it has been accepted onto the NSW Government ICT Services Scheme – Advanced Registration Supplier List. This appointment means Relegen is accredited to supply customer contracts that are high risk or valued at over \$150,000 to the NSW Government.

The NSW Government ICT Services Scheme offers a panel of prequalified suppliers to provide a range of ICT solutions to assist NSW Government agencies and other authorised buyers. It aligns with the NSW Government ICT Strategy, which provides a comprehensive approach to identifying, sourcing and procuring ICT goods and services, to ensure government harnesses new, innovative and effective approaches. Applications for the Advanced Supplier List undergo a more rigorous assessment due to the value and risk profile of the services.

Relegen has been accepted for a total of 33 sub-categories, including Enterprise & Business Architecture, Strategic Risk Management, Mobile Devices including delivery 'as a service', Digitisation including delivery 'as a service', Process and Technology Audits, Quality Assurance and Compliance, Custom Application Development including delivery 'as a service', ERP and related corporate and shared services, as well as many others.

"We are proud to be accredited on the Advanced Registered Supplier List for the NSW Government ICT Services Scheme", said Paul Bennett, Relegen's founder and Managing Director. "We have a considerable track record of delivering enterprise intelligence technology and services to government agencies and have a number of key government customers. This prequalification will make it easier for government agencies to evaluate and access emerging asset and risk intelligence technologies and related services, and greater opportunities for our company to deliver business value for the NSW government on critical ICT projects. We look forward to the benefits this scheme will bring to both sides of the table."

About Relegen Pty Ltd

Relegen Pty Ltd has a proven track record of supplying people and enterprise intelligence technology solutions to the Australian Defence Force since 2001. Today, our expertise is leveraged by clients operating in asset-intensive industries including mining, government, manufacturing, utilities and more across Australia and around the world. We are an accredited Major Service Provider to the DMOSS Panel, a key divisional supplier to DMO Maritime, ISO 9001 certified and a preferred partner to top tier firms. Our enterprise intelligence technology solutions – [assetDNA](#) and [riskDNA](#) – help organisations unify critical enterprise information silos into a single, authoritative point of truth. Organisations can use this new-found intelligence to support faster, smarter decisions that reduce enterprise risk, maximise return on assets and drive better business performance.
